Building Energy Engineers:

Partner with PowerGreen Capital to put customers' energy efficiency and air quality projects on a fast track to certain success.

C-PACE financing from PowerGreen combined with new IRA tax incentives slash the cost of energy transition projects and motivate customers and prospects to improve their buildings now.

As you shepherd the design, construction, and measurement of C-PACE projects, your value to the owner, contractors and lenders lends itself to deeper relationships

Packaging In C-PACE Increases Your Value

By introducing C-PACE, you can deliver a full package of value from design to construction, funding, and performance management

C-PACE Is Linked to a More Expansive Role

The expansive scope of what C-PACE covers underscores the full range of efficiency and renewable recommendations you make, engaging you in resulting project development and monitoring

TRANSFORM YOUR BUILDING

C-PACE Enables the Highest and Best Use of Your Skills

By accessing C-PACE, building owners have the capital to fund a fully integrated solution delivering the comprehensive energy savings that your expertise enables

C-PACE Differentiates You from the Competition

Most building owners are not familiar with C-PACE and will appreciate you introducing them to the many benefits it delivers

The IRA Creates More Project Opportunities

IRA tax incentives span the range of efficiency and renewables projects motivating building owner interest in comprehensive energy transitions (including for non-profits)
